

# Data Viz with Seaborn

---

## Learning goals:

- Understand the basics of tidy data.
- Learn how seaborn enables fast exploration of data.
- Make progress on A4.

# Tidy Data

- **Data table with a particularly useful format:**
  - **Every variable has its own column**
  - **Every observation has its own row**
  - **Every value has its own cell**

Use **pd.melt** to turn columns into rows  
and **pd.pivot\_table** to turn rows into  
columns.

# seaborn

# seaborn

- **Makes common statistical plots from tidy data.**
- **Typical usage:**

```
sns.someplot(x='...', y='...', data=...)
```

```
sns.barplot(x='sex', y='survived', data=ti)
```

	survived	class	sex	age	fare
0	0	Third	male	22.0	7.25
1	1	First	female	38.0	71.28
2	1	Third	female	26.0	7.92
...	...	...	...	...	...
888	0	Third	female	NaN	23.45
889	1	First	male	26.0	30.00
890	0	Third	male	32.0	7.75

```
sns.lmplot(x="total_bill", y="tip",  
           col="day", hue="day", data=tips)
```
